U.S. NAVY (GUAM) REPORTS

I. Febrile respiratory cases identified via USNH E.D. visit review.

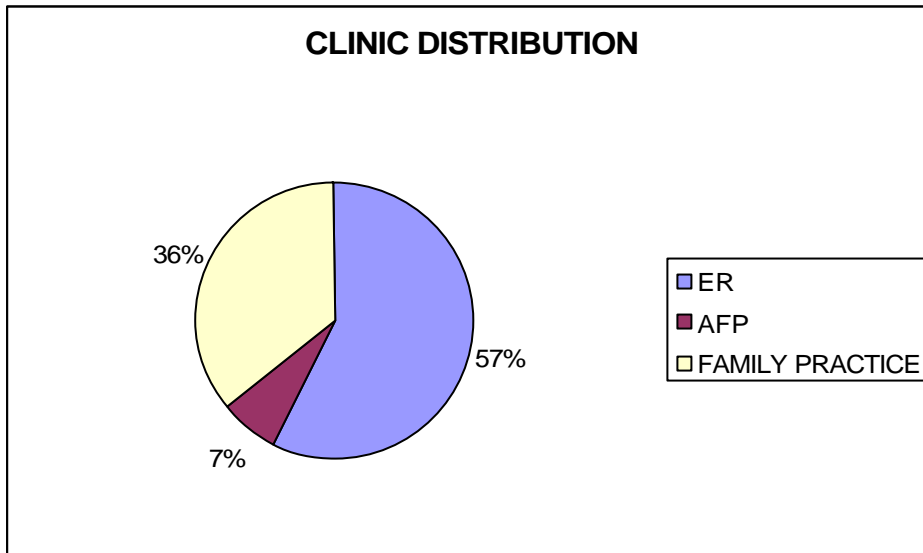

II. Incidences of pneumonia identified via USNH E.D. visit review, DOD web-based Syndromic Surveillance review, and Preventive Medicine rounds of Inpatient Clinics.

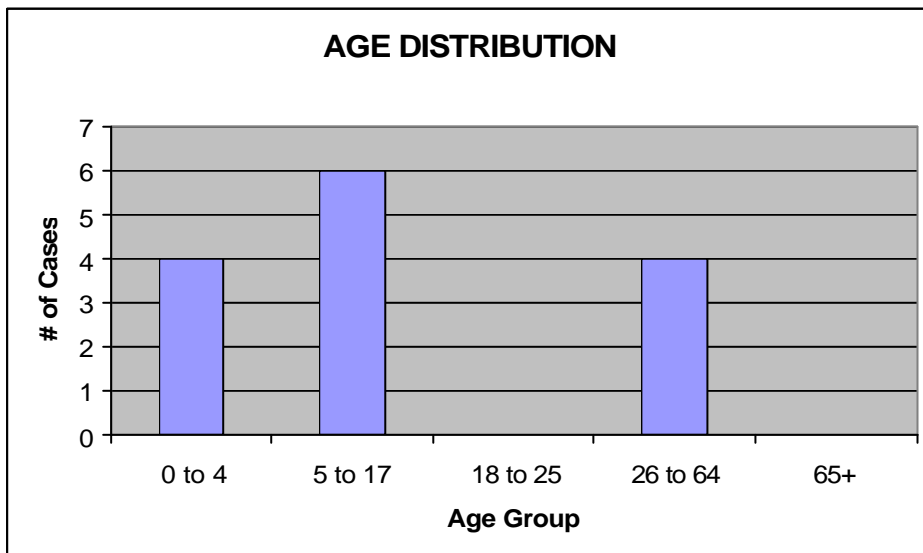

For the period of 1 MAY to 7 MAY 2006:

- Fourteen cases of pneumonia were identified.
- Thirteen cases were identified at Naval Hospital Guam. One case was identified at Andersen Family Practice (AFP).
- Distribution by clinic as follows.

- Two patients were admitted for Community Acquired Pneumonia.
- Ages were distributed as follows:

- Of the fourteen cases, five cases were identified on 7 May 2006 in the ER. All of the five cases were in the 0 to 4 age group.
