Notes:

~ indicates trend is unchanged; ▼ indicates trend is decreasing; ▲ indicates trend is increasing.

Countries are asked to email their weekly reports to WHO Fiji, Emerging Disease Surveillance and Response, at surveillance.sp@wpro.who.int

Fever is defined as 38 °C / 100.4 °F or higher. If no thermometer is available, fever or chills reported by the patient or the caregiver are also acceptable.

"-" indicates that no information is available
