

September 5<sup>th</sup>

Evolution of number of cases for the 8 selected syndromes, for **Wednesday September 4<sup>th</sup>**

**Participating sites for Wednesday the 4<sup>th</sup>:** Three dispensaries in Wallis and one dispensary in Futuna reporting. All the six temporary sentinel sites set up specifically for the Mini Games are now fully operational for surveillance reporting. All 10 sites planned to report during the Mini Games are thus currently reporting.

Dispensary	Number of syndromes observed during the day									Patients with $\geq 1$ syndrome
	Patients seen	AFR	Watery Diarrhoea	Non-Watery Diarrhoea	ILI	Prolonged Fever	Acute Fever & Neurological Symptoms	Food borne disease outbreak	Heat-related-illness	
Hihifo	33	0	0	0	1	0	0	0	0	1
Hahake	33	0	0	0	1	0	0	0	0	1
Mua	40	0	0	0	0	0	0	0	0	0
Kaveleve	18	0	0	0	0	0	0	0	0	0
Lycée d'Etat	7	0	0	0	0	0	0	0	0	0
Collège Lano	7	0	0	0	0	0	0	0	0	0
Ecole Futuna	8	0	0	0	0	0	0	0	0	0
Stade Kafika	21	0	0	0	0	0	0	0	0	0
Ecole Malateoli	0	0	0	0	0	0	0	0	0	0
Urgence Sia	1	0	0	0	0	0	0	0	0	0
Total	168	0	0	0	2	0	0	0	0	2

- **Acute Fever & Rash:** No cases observed.
- **Watery Diarrhoea:** No cases observed.
- **Non-Watery Diarrhoea:** No cases observed.
- **Influenza-like-illness:** Two children from Wallis and Futuna observed, one at Hahake and one at Hihifo.
- **Prolonged Fever:** No cases observed.
- **Acute Fever & Neurological symptoms:** No cases observed.
- **Food borne disease outbreak:** No cases observed.
- **Heat-related-illness:** No cases observed.

Following an investigation and a notification by the Food Inspection Service (BIVAP) of a sanitary breach at one of the canteens of the delegations, the EpiNet team of Wallis and Futuna are doing sanitary interventions in three canteens of the delegations.

#### Conclusion/recommendations:

- All reporting sites set up for the Mini Games are now operational. Patients seen at sentinel reporting sites have increased during the first week of surveillance (see Graph 1 below)
- The initial observed slight increase in influenza like illness (ILI) has not been sustained (see Graph 2 below), but NPS was taken for one of the ILI cases and is being followed-up.
- Smears and rapid tests for malaria were negative on the case of Prolonged Fever from Papua New Guinea. Further investigation is ongoing, including: dengue fever, chikungunya and

leptospirosis infections. There are currently no reported secondary cases of prolonged fever having been in contact with the case.

- After the initial case of non watery diarrhoea, there have been no further cases of non watery diarrhoea and still no clusters of diarrhoea observed (see Graph 2 below), hence there is no further investigation planned at this stage.
- The case of prolonged fever from Urgence Sia Tuesday 3<sup>rd</sup> of September is being followed up
