

September 6th

Evolution of number of cases for the 8 selected syndromes, for **Thursday September 5th**

Participating sites for Thursday the 5th: Three dispensaries in Wallis and one dispensary in Futuna reporting. All the six temporary sentinel sites set up specifically for the Mini Games are now fully operational for surveillance reporting. All 10 sites planned to report during the Mini Games are thus currently reporting.

Dispensary	Number of syndromes observed during the day									
	Patients seen	AFR	Watery Diarrhoea	Non-Watery Diarrhoea	ILI	Prolonged Fever	Acute Fever & Neurological Symptoms	Food borne disease outbreak	Heat-related-Illness	Patients with >=1 syndrome
Hihifo	28	0	0	0	0	0	0	0	0	0
Hahake	44	0	0	0	0	0	0	0	0	0
Mua	18	0	1	0	0	0	0	0	0	1
Kaveleve	33	0	0	1	0	0	0	0	0	1
Lycée d'Etat	0	0	0	0	0	0	0	0	0	0
Collège Lano	0	0	0	0	0	0	0	0	0	0
Ecole Futuna	8	0	0	0	0	0	0	0	0	0
Stade Kafika	24	0	0	0	0	0	0	0	2	2
Ecole Malateoli	1	0	0	0	0	0	0	0	0	0
Urgence Sia	10	0	1	0	0	0	0	0	0	1
Total	166	0	2	1	0	0	0	0	2	5

- **Acute Fever & Rash:** No cases observed.
- **Watery Diarrhoea:** 2 cases observed among adults from different villages in Wallis and Futuna. 1 was reported from Mua and 1 from the emergency ward of the main Hospital SIA
- **Non-Watery Diarrhoea:** 1 adult case observed at the dispensary in Futuna (Kaveleve).
- **Influenza-like-Illness:** No cases observed.
- **Prolonged Fever:** No cases observed.
- **Acute Fever & Neurological symptoms:** No cases observed.
- **Food borne disease outbreak:** No cases observed.
- **Heat-related-Illness:** 2 cases observed at the sentinel site at the Kafika stadium.

All reporting sites set up for the Mini Games are now operational. Patients seen at sentinel reporting sites have increased during the first week of surveillance (see Graph 1 below)

Following investigation and a notification by the Food Inspection Service (BIVAP) of a sanitary breach at one of the canteens of the delegations, the EpiNet team of Wallis and Futuna are doing sanitary interventions in three canteens of the delegations. A meeting between the Agence de Sante, SPC and BIVAP the service responsible for addressing sanitation in catering facilities discussed the actions recommended for the Lycee d'état restaurant. The Agence de Sante will now take on the responsibility of screening of all food handlers and analysing of samples taken during the examinations.

Conclusion/recommendations:

- Despite an overall increase in patient visits to the sentinel sites, the percentage of patients reported with one or more syndromes is stable and low (see Graph 1 below)
- A stool sample for the watery diarrhoea case from the emergency ward of the main Hospital SIA (notified 05092013) is currently being processed by the lab and results will be available in 72hrs. The watery diarrhoea case at Mua (notified 05092013) should be further followed up.
- The initial observed slight increase in influenza like illness (ILI) has not been sustained (see Graph 2 below), but NPS was taken for one of the ILI cases and is being followed-up.

- Smears and rapid tests for malaria were negative on the case of Prolonged Fever from Papua New Guinea (notified 02092013). Further investigation showed IgM positivity for leptospirosis, which should be confirmed by PCR analysis at reference laboratory (IPNC, Noumea). The patient is now well and there are no additional cases from the PNG delegation or other delegations.
- There was 1 new case of non-watery diarrhoea observed at the sentinel site in Futuna. No clusters of diarrhoea observed (See Graph 2 below), no further investigation is planned at this stage.
- The case of prolonged fever notified from Urgence Sia on Tuesday 3rd of September is being followed up
